

# A S M Taseen

taseen08.github.io — ataseen@uwaterloo.ca — in/a-s-m-taseen — github.com/taseen

## TECHNICAL SKILLS

---

**Languages:** JavaScript, TypeScript, SQL, C++, C, C#, Python

**Technologies:** React, Redux, MongoDB, PostgreSQL, AWS, DigitalOcean, Git, Linux

## EXPERIENCE

---

### TutorOcean

Ottawa, ON

Incoming Full Stack Developer Intern

May '22 – Aug '22

- Expected to work on infrastructure with REST APIs, **AWS API Gateway**, and **AWS Lambda**
- Recommence in the B2C marketplace team for **SEO** improvements to increase customer acquisition

### TutorOcean

Ottawa, ON

Full Stack Developer Intern

Sept '21 – Dec '21

- Integrated **HubSpot API** to track **25** unique customer data in HubSpot from the user life cycle of **20,000+** user to improve **lifecycle marketing** which increased customer conversion rates by **18%**
- Enhanced the message flagging scope by generating effective **regex** in **MongoDB** database to increase customer retention by reducing the threat of prohibited internal promotions via the messaging system
- Worked on **Search Engine Optimization** by creating **20+** pages with **React** and **Redux** that increased keyword indexing by **2190+** keywords and website impressions by over **78000**
- Implemented user-facing features on French version of the marketplace website used at **Bell Canada**

### Hexa

Waterloo, ON

Co-founder & Frontend Lead

Oct'21 – Present

- Architected a multi-service EdTech platform for a market of **3 million** customers across **160** countries
- Utilized **DigitalOcean** cloud services to provision a **PostgreSQL** managed database for record storage and integrate load balancing to facilitate horizontal scaling to improve performance across two servers
- Developed UI with **React**; designed the user flow to minimise clicks and maximize conversion rates
- Collaboratively devised algorithms having low computational complexity to facilitate a highly granular searching and sorting mechanism across a search-scope of **12000+** records

## PROJECTS

---

### EvenJobs

[github/repo](#)

- Built an online job search platform for the odd/part-time job sector in Bangladesh using **React**
- Set up **Firebase Authentication** for allowing secure sign in and sign up actions of the users
- Integrated **Cloud Firestore** and **Redux** to collect, store, and assign user data across the platform
- Enabled an email communication system for employers and candidates to connect via the website

### Biquadris

- Built a dual player tetris game in **C++** using **OOP** principles with a **GUI** created using **XQuartz**
- Leveraged design patterns like **Observer** to minimize coupling and **Decorator** to enhance flexibility

### Crypto Tracker

[github/repo](#)

- Developed a tracking website for cryptocurrencies with **React** to keep up with real-time statistics
- Utilized the **Axios** library to eliminate **CSRF** and to fetch cryptocurrency data from a **REST API**

## EDUCATION

---

### University of Waterloo

Sept '20 – Apr '25 (expected)

Bachelor of Computer Science, 2x Dean's Honours List
